OHA's archive also links separately posted PDFs for the tracked-changes rule text, Client Rights and Responsibilities, Informed Consent, the RAC draft, the June 26 distribution-list message, and the 2026 Public Listening Sessions summary. Where the exact standalone source file was not available in the user's file library for byte-for-byte materialization, this package does not falsely label a recreated document as the original. Exact extracts from the filed Notice are included where useful.
